ADDICTED TO PRECISION

In its multi-year strategic plan for industrial and commercial development, Sea Style Company has established a specific internal business unit, called **Design and Marine Engineering (DME)**.

The obsession for precision, from operational programs to construction processes, from material selection to welding quality, has pushed Sea Style Company to equip itself with its own engineering services, in order to optimize the work of every stage of life of a shipyard, minimize design risks, increase the competitive factors of its customers and even trace a virtuous path towards production diversification.

Today Sea Style Company, together with its purely industrial services, is able to provide turnkey services in the following areas:

- Reverse engineering;
- Industrial design;
- Naval architecture;
- Technical testing and commissioning;
- Marine and ocean engineering;
- Deep-sea and underwater Technology;
- Facility management;
- Maintenance planning.

A definitive attention to design and construction details that has become a distinctive feature of the Sea Style Company brand and which guides its entire organization.

THE SEA HAS NO BOUNDARIES

The DME business unit is also responsible for conducting all of Sea Style Company's research and development programs.

In Sea Style Company's vision, the sea is an inexhaustible source of prosperity and growth, even a driver of peace between peoples, so every innovative effort is aimed at exploring all the possibilities of the blue economy and the maritime cluster, including renewable energy and raw materials scenarios, always with a sustainable approach.

Some of the initiatives currently being designed or tested are being developed in collaboration with the authoritative Polytechnic of Bari (Italy) and its young researchers, as well as being candidates for European Union funds, above all those of the "Horizon Europe 2021-2027" program.

THE CURRENT CERTIFICATIONS

All Sea Style Company's business units and construction sites are managed according to the highest HSEQ standards. Sea Style Company is also certified to participate in public tenders in the EU and has been awarded the double star legality rating by the Italian authorities.
