AN EXPERIENCE WITHOUT COMPARISON

With its large business unit called **Industry Service Providing (ISP)**, Sea Style Company now represents an international excellence in the panorama of heavy carpentry and plant engineering.

The operational capacity in crucial industrial sectors, the experience gained over time, the high professionalism gathered within it, the reliability in respecting the schedules of the orders, the propensity to continuously innovate processes and products, the versatility in facing technical obstacles, especially thanks to the wide availability of construction sites, have made Sea Style Company a very competitive supplier, always oriented towards the most daring goals of the customers.

All this, with an approach constantly very attentive to the training, needs and safety of the workforce.

The choice of Sea Style Company is a winning one for the most demanding operator, when observing the integration of the use of technologies, engineering experiences, manufacturing in internal workshops, constructions on the field, the optimal organization of the processes, often implemented thanks to historical first-rate international collaborations. In general, it is therefore **a single window** that generates lower costs and the best results on the most diverse plants and networks.

OUR VALUABLE SERVICES

Sea Style Company is structured to manage, from inception to delivery, including risk assessment, industrial projects in the most challenging contexts, with proven skills in the following areas:

- EPCIC contracting;
- Industrial carpentry, including the oil&gas sector;
- Renewables and utilities plants;
- Safety and environmental systems;
- Offshore works.

The main ISP production sites and the technical-scientific laboratories:

Location	Total area (m2)	Warehouses (m2)	Offices (m2)
Massafra-Taranto	8,000	3,000	800
Massa	11,000	8,800	2,000

MASTER CARPENTERS

Sea Style Company has in its team of operators a real school of **remarkable carpentry and welding specialists**, recognized by many parties, which can also count on internal designers capable of developing from feasibility analyses to industrial prototypes, up to the complete management of the projects themselves and their commissioning, through the use of company design and production softwares (CAD and CAM).

All prefabrication and assembly activities, which can concern **any type of metal structure** (pipes, skids, various components, etc.), are carried out at own operating sites, where the most diverse order needs can be satisfied.

The experience and expertise of Sea Style Company operators guarantee the supply of high-quality products, with tailor-made solutions to meet the specific needs of customers in multiple industrial sectors, contributing decisively to the safety and efficiency of industrial processes.

Below is a non-exhaustive list of the works that Sea Style Company usually carries out (construction and assembly), with a production potential of **up to 160 tons per month**.

Light carpentry:

- Ducts for ventilation and dust extraction systems;
- Unloading hoppers and conveyor belt heads;
- Suction hoods;
- Brackets and collars for pipes;
- Skid systems;
- Various carpentry and ducts;
- Piping.

Heavy carpentry:

- Water treatment and desalination systems;
- Oil&gas package systems;
- Utilities and auxiliary systems for energy production;
- Components of steel plants and strategic unit operations;
- Continuous casting machines;
- Skin-pass mills;
- Rotary mills;
- Electric arc furnaces;
- Blast furnaces and dust removal systems;
- Naval systems;
- Other complex systems.

Special steels:

- Structural steel for industrial buildings;
- Platforms, bridges, towers, etc.;
- Storage tanks, stacks;
- Secondary structures.

OUR OPERATIONAL FORCE

Sea Style Company has diversified the training of its technical staff and strengthened safety standards in the workplace, being able to count on the equipment specified below, for performances up to 160 tons/month of workable medium-light metalwork.

- No. 2 10 t overhead cranes;
- No. 1 5 t overhead crane;
- No. 3 500 Kg jib cranes;
- No. 2 1000 Kg jib cranes;
- No. 1 calender for thicknesses up to 30 mm;
- No. 1 calender for thicknesses up to 15 mm;
- No. 1 150 t press-bending machine, 3 m working surface;
- No. 1 shear, 3 m working surface;
- No. 1 600 mm band saw;
- No. 4 300 mm band saws;
- No. 2 multifunction punching machines;
- No. 3 column drills;
- No. 1 profile bending machine;
- No. 1 pantograph for plasma cutting, 3000*13000 bench;

No. 2 pneumatic bevelling machines up to 16”;
No. 1 sandblasting cabin 6000*4000, complete with compressor;
No. 2 4 t lifts;
No. 1 8 m vertical platform;
No. 9 wire welders;
No. 7 static welders;
No. 1 electrode drying oven;
No. 1 electrode maintenance oven;
No. 2 inverter welders;
No. 2 manual plasma cutters;
No. 2 magnetic drills;
No. 1 5000 l motor compressor;
No. 1 sandblaster;
No. 1 airless;
No. 1 lathe;
No. 3 rotary tables;
No. 2 pairs of positioners;
No. 2 compressors complete with dryers and accumulation tank;
No. 1 sheet metal chamfering machine;
No. 2 pressure washers;
No. 1 electric die.

SPECIAL TREATMENTS

In its two main production sites, both strategically positioned with respect to the main national intermodal connections (motorways, railways and maritime ports), Sea Style Company carries out all phases of the order, from the processing of the raw material to the preparation of the welded and finished product, including sandblasting and painting activities, from research to testing services.

Precisely in relation to surface treatments, the production sites, with their size and versatility, are equipped with cutting-edge extraction and emission reduction systems. In accordance with the most rigorous technical-regulatory standards, the environments dedicated to sandblasting and painting, moreover, are closed and placed under light pressure, with the possibility of activating dehumidification or heating, thus allowing work on several consecutive shifts and in all weather conditions.

The company's own asphalted yards, fenced and monitored 24/7/365, are also suitable for optimal storage and less expensive logistics management of large quantities and varieties of both raw and painted products.

Among the operations performed consistently with the best quality/price ratio for the most varied industrial customers, it can be report:

- Surface treatments on metals and anti-corrosive, anti-acid and fire protection treatments;
- Insulation on tanks, skids, valves and pipes;
- Application of cold-hardening paints for the coating of condenser water boxes;
- Application of cold-hardening paints for the coating of tube plate boxes;
- Passive fire protection certified with ISO834 Hydrocarbon Pool and Jet Fire curve;
- Surface treatments for aluminum and stainless steel with glass, garnet, corundum and other synthetic abrasives.
- Painting and anti-corrosive coatings for industrial plants and equipment;
- Painting and anticorrosive coatings for industrialized construction (structures, panels);
- Internal coating of tanks with solvent-free products, based on vinyl ester and ceramic;
- Internal coating (for food use phenolic) and external coating of valves (epoxy polyurethane resins);
- Hot metallization Arc Spray method with aluminum coating.

SOMETHING ABOUT QUALITY AND SUSTAINABILITY

All our opportunities, every daily emotion and even the memories of solid growth come from the sea, and from nature in general. This is why Sea Style Company believes that there can be no progress and results if not in full respect of the environment that surrounds us. The quality that our operators put into every action on construction site takes on value in the eyes of the most demanding and sensitive customers only if accompanied by the most **stringent rules of sustainability and circularity**.

If an industrial activity is not good for the sea, then it is not a project for Sea Style Company. It is no coincidence that we wrote “**we the sea**” in our company payoff, because we believe in it and with this spirit every product that leaves our factories responds to the logic of the sustainable development goals of the **United Nations Agenda 2030**.

For further information, please refer to our annual sustainability report.

THE CURRENT CERTIFICATIONS

All Sea Style Company's business units and construction sites are managed according to the highest HSEQ standards. Sea Style Company is also certified to participate in public tenders in the EU and has been awarded the double star legality rating by the Italian authorities.
